NEMACO™
EXCELLENT ENCLOSURES

Product Line Card

NEMACO™ manufactures NEMA-rated and UL Listed electrical enclosures for industrial, commercial, and defense applications. Headquartered in Houston, Texas, NEMACO™ produces server rack cabinets, control cabinets, junction boxes, and submersible enclosures in galvanized steel, aluminum, stainless steel, and fiberglass. Built and tested to NEMA 250, UL 50, and IEC 60529 standards. Custom and modified enclosures are available across all product lines.

SERVERPRO™ 19” EIA Rack Mount Server Cabinet | NEMA 4 / 4X / 12 · IP66 · UL File E507642

Single Bay NEMA 4
Galvanized Steel | Aluminum

Single Bay NEMA 4X
304/316L Stainless

Double Bay NEMA 4
Galvanized Steel | Aluminum

Double Bay NEMA 4X
304/316L Stainless

SUBPRO™ Submersible Enclosures | NEMA 6 / 6P · IP67 / IP68 · UL File E496085

ECO
304/316L Stainless

Heavy Duty Performance
304/316L Stainless

Alum Tec
Aluminum Alloy

FRP
Fiberglass (non-UL)

FLEXBOX™ Junction & Pull Boxes

NEMA 4
Galvanized Steel | Aluminum

NEMA 4X
304/316L Stainless

NEMAPRO™ Electrical Control Cabinet

NEMA 4
Galvanized Steel | Aluminum

NEMA 4X
304/316L Stainless

CUSTOMIZED ENCLOSURES Built to Specification

Custom NEMA 6P Submersible Enclsoure
304/316L Stainless

Custom NEMA 4/4X 19” Server Rack Cabinet
Galvanized Steel | Aluminum | Stainless

NEMACO™
EXCELLENT ENCLOSURES

Why Choose Us

Build to Last. Delievered with Care.

NEMACO™ manufactures every enclosure to order from its Houston facility. From standard NEMA-rated cabinets to fully engineered submersible enclosures, each product is built to the exact electrical and environmental specification the installation requires and verified before it leaves the floor.

Advanced 3D Design & Prototyping

In-house CAD engineers translate your specs into precise 3D models, enabling rapid prototyping before production begins, reducing revisions, shortening timelines, and delivering exactly what you need - the first time.

Precision Fabrication

Our American manufacturing facility uses CNC machining, laser cutting, and brake-press forming on galvanized steel, aluminum, and stainless steel, producing tight tolerances and consistent results across every run.

Strong Quality Control

Every enclosure is inspected against NEMA 250 standards, with UL Listed certification on applicable product lines. Rigorous in-process checks and final audits ensure zero-defect deliveries you can count on.

Flexible Lead Times

Standard stock items ship fast, and our agile production floor accommodates urgent custom orders without sacrificing quality. We work with your schedule, not the other way around.

Custom Engineering Support

From cutouts and mounting hardware to specialized coatings and unique configurations, our engineers partner with you at every step and deliver custom-engineered solutions for the most demanding enclosure applications.

Reliable Packaging & Logistics

Products are packaged to protect finish and structure in transit, with logistics partners and freight options aligned to your delivery requirements so enclosures arrive ready to install, not ready to rework.

Made in U.S.A
